

MATERIALS ACQUISITION & MAINTENANCE POLICY

The Fremont County Library System is mandated to furnish materials to all people in its service area, to meet their informational, recreational, and educational needs. These needs will be met by providing free access to printed, AV, and electronic resources, including unfiltered internet access, that reflect a diversity of ideas, opinion and thought. The Board of Directors of the Fremont County Library System has delegated this responsibility to the County Librarian and library staff.

NOTE: The FCLS adopted the Library Bill of Rights, which was endorsed and revised by the Council of the American Library Association in 1980; the Freedom to Read Statement as revised in 2004; and Libraries, an American Value [approved by WLA in draft, 1998].

Challenged Materials

It is the policy of the Fremont County Library Board of Directors to provide a process that allows the public to question the presence of specific materials in the library collection. Procedures for challenging materials are available at each library within the system.
